Yesterday arrived the Mail due from Holland.

According to Letters from Gibraltar, Affairs in Barbary have taken another Turn, by a great Alteration which has happened in the Empire of Morocco, of which they give us the following Particulars.

Muley-Achmet Ben Huriba Brother to King Muley Abdallah, having been made Governor of Fez by the Body of the Citizens, found Means to bring over to his Interest one Part of the Army of Blacks, which differed from the other in some Matters of Religion, his new Friends, without any more ado, attack'd the others, who kept the City of Fez block'd up, and put them to Flight with very great Loss. After this he was proclaim'd King of Fez and Morocco, and immediately married the Daughter of one of the Chief Citizens of Fez, which caused an inexpressible Joy throughout that City and all its Districts, there being the greater Hopes that his Reign will be happy, because he is a debonaire Prince, of a good natur'd and peaceable Temper; whereas his Brother Muley Abdallah is a Monster of Violence and Cruelty. The Inhabitants of Fez, in Consideration of his having married one of their Daughters, have agreed to furnish him with 300 Quintals of Silver every Year, as well as the Property of several Duties; Muley Achmet Ben-Huriba having consented on his Part that the Impost on Wax and some other Commodities, shall be taken off, and that any one shall be permitted to buy or sell Goods, on paying the ordinary Duties. King Muley Abdallah receiving News at Mequinez of this great Revolution, fled to the Mountains so suddenly with the Treasure, &c. on the Backs of 600 Mules, that a great Detachment of Horse which the new King sent to pursue him, could not overtake him, nor learn which Way he was gone.

The Letters from Lisbon mention the Arrival of the Fleet from the Bay of All Saints in Brasil, consisting of 12 Merchant Ships, besides a Ship from Goa, under Convoy of a Man of War, with a Cargo of 6000 Chests of Sugar, 11,000 Rolls of Tobacco, 3000 Ounces and half of Diamonds, weighing each Carats, 6 Millions and half of Gold in Cruzadoes, which there are 4 Millions and a half for the King, and the rest for private People. The Crop of Sugars tall'd so much this Year in Brasil, that many of the Merchant Ships are returned in Ballast. The Portuguese have Advice by their Letters from that Country, that the Hostilities were continued between their Countrymen and the Spaniards in and about Rio de la Plata, and that the Portuguese have taken a Fort belonging to the Spaniards call'd Monte Medo, an important Post, which however the Spaniards hoped to recover, after the Arrival of some reinforcements which they expected from Cadiz.

They write from Constantinople, that the Emperor's Ambassador the Baron de Dahlman, had a long Audience of the Grand Signior, and that the Ministers of the Divan gave him Hopes that his Highness would accept the Emperor's Mediation for Accommodation betwixt the Porte and Russia. The Venetian Minister at the Porte has acquainted the Masters, that the Grand Signior being informed of the Preparations of War making at Venice, inform'd him by the Kaimacan, that his Highness would be glad to know whether the Republick intended War or Peace with the Porte. They write from Venice, that the Senate, after a Consultation upon, sent Orders to their Minister to tell the Kaimacan, that they did not intend to violate or interrupt the Peace between the Grand Signior and the Republick, unless any Circumstances should arise on the Part of the Turks, that should put them under Necessity of proceeding to a Rupture with the same.

They write from Vienna, that the Difficulties concerning the Cession of Lorain being accommodated, the French Minister has, by Order from his Imperial Majesty, declared to the Imperial Court, that his Master, for preventing any more In-

conveniencies in that Affair, was very desirous that the Boundaries might be settled betwixt Lorain and the Dominions of the Empire; and that for this End his Master would forthwith appoint Commissioners to meet and fix this Matter with such as should be appointed by the Emperor and the Duke of Lorain. The Letters add, that the Emperor and the Duke have actually consented to this Regulation, and nominated their Commissioners, who are the Count de Coleredo and the Baron de Palm.

The Emperor demands 20,000 Men of his Hereditary Dominions for next Year's Service, besides the Sums necessary for their Maintenance. His Imperial Majesty has made a new Promotion of Eleven Knights of the Golden Fleece, in which Number are the Counts de Khevenhuller and Staremburg, the Count de Harrach, and the two Counts de Sinzendorf.

They write from Berlin, that M. Poussin the French Minister to the Circle of Lower Saxony, has had a very gracious Reception from the King of Prussia, and an Audience of his Majesty upon the particular Affairs which called him thither.

The Letters from Hanover take Notice what numerous and splendid Courts there are every Day of the Ministers of Princes, and of other Persons of the first Rank, to wish his Majesty a happy Voyage to his British Dominions; his Departure for which was absolutely fixed on Tuesday last.

The Chapter of the Bishoprick of Eichstad have unanimously chose for their Bishop the Baron de Freyberg de Hopferau, one of their own Cannons, who is Threescore Years old.

The Damage done by the late Storms of Wind in the Elbe upon the Coast, as well as in the neighbouring Countries by Inundations, is inexpressible: Four great Ships and Five lesser ones have been cast away near Heylegland, besides another near the Calveredam, the Cargo of which amounting to above 150,000 Marks, was all lost: And they have the sad Tidings at Copenhagen, that one of their India Ships bound from thence to Tranquebar, had run ashore near Schagan, but the Crew were all saved and some Chests of Silver taken out of her. The Inhabitants of Emden and other Places in East Friesland, have suffered very great Damage by a general Inundation in that City and its Territory, several Dikes and Bridges having been carried away by the Rapidity of the Waters.

They write from Italy, that the Baron de Neuhoff is with his Secretary, the Advocate Costa, at Signa Terra, about a League from Pisa, but that he and his Equipage are in such a poor Plight, that if we may believe the Report of his Enemies, he has been obliged to sell some Scraps of Plate that he brought from Corsica, for 70 Sequins to bear his Charges. They add, that he had scarce quitted the Island, but he met a Genoese Vessel of Force, which might easily have taken his Vessel, if the Spanish Officer that commanded her had thought it worth his while.

Edinburgh, Dec. 2. The Ship mentioned in one of our former to have been cast away on the Island Gigha, in Argylshire, is the Brigantine the Three Brothers, Benjamin Kierstead, Native of New York, Master and Owner, bound from Funchall in the Island of Madera for London, with Wine, Cordocitron, and some Bags of Orchal: The Weather had been so foggy, that he had no Observations from the 18th of October; the Storms were for several Days from S. W. he attempted to Anchor upon the Coast of Ireland, but in Vain, and was drove from thence upon the Argylshire Coast, where the Captain and Crew were quite unacquainted, the Storm was most raging, and he had no Cable he could trust to; finding themselves Landlocked between the Island of Gigha and the Coast of Kintyre, Rocks on all Hands, no Room to stretch, and nothing but Death in all Appearance before their Eyes; the Vessel at length struck first on one Rock and then on another, and gave them a joyful Opportunity of getting upon Land with their Lives: This happened upon the 29th of October.

The Gentlemen and other Inhabitants of the Island, came up soon and took away the Cargo. The Master was so fatigued, distressed and distracted with

his Misfortunes in a strange Country, without Money, that he did not look after any Thing, having no Hopes in their Circumstances even to recover the Vessel, tho' she does not seem to be much hurt: The Gentlemen that intromitted with the Cargo, to conceal it from the King's Officers, dispersed it up and down the Island, by which Means it was much damaged; at length considering it was proper for them to make up some Title to it, they prevailed with the Captain to give them some Sort of Right to the Vessel and Rigging, and took a Right from the Crew to the Cargo by Way of Donation.

Mr. Campbell of Stonefield, Sheriff-Admiral Deputy, having had Advice of all this Affair, went to the Island, accompanied with the Collector of the Customs, and Mr. M'Neil, Riding-Officer, and has recovered 9 Pipes of the Wine, and about 40 Boxes of the Citron, which is lodged in a Place of Security, for the Behoof of all Parties having Interest; he has likewise given Orders for saving the Vessel.

The Captain upon Examination produced to the Admiral several Certificates, Passes and other Evidences, which seem to clear him of any Suspensions of unseemly Practices. There was no Ammunition aboard, little or no Provisions; the Captain had only 20s. of Cash, there were 4 Iron Guns in the Fore-castle, which did not seem fit for Service, and one Firelock only.

We hear the Captain and his Crew, consisting of six Men and a Boy, are come to Inverary.

On Tuesday last being St. Andrew's Day (the Titular Saint of Scotland) there was a Meeting of the Masters and Wardens of near 40 regular Lodges of the most ancient and honourable Society of Free and Accepted Masons, at St. Mary's Chapel, where they unanimously elected William St. Clair of Rollin, Esq; Grand Master of all the Lodges in Scotland, who after the Election appointed his Deputy, also the Grand Wardens, and the other proper Officers.

Executor of Thomas Mertham his Father, deceased, and likewise against the said Thomas Mer-sham, on his own Account, and Peter Body, and Edward Turner for double Duty on Made Wines, under the Denomination of Sweets, the whole Sum amounting to 558 l. 2 s. The Matter was learnedly argued by Counsel on both Sides, Counsellor Hammet on the Crown Side, and Counsellor Key on the Defendant's, and after two Hours Debate upon several Acts of Parliament relating to the Excise, the said Justices upon the Proof before them, gave their Opinion, that Made Wines could not be brought under the Denomination of Sweets; and therefore was not liable to the said double Duty.

March 25, 1736.
PROPOSALS for publishing by Subscription a Collection of the small Birds that are to be met with in this Kingdom, not exceeding the Size of the Black Bird. Collected by John Lee, of Great Raddon in the County of Essex; and Designed by Charles Collins, in Holbourn, near Southampton-street End, Bloomsbury, London.

It is intended, that all the Birds shall be drawn in their proper Bigness and Actions, suitable to the Nature and Manner of the Bird, that the Life may be represented as near as possible: And also the Cock and Hen of every Sort shall be exactly describ'd, which has never yet been done.

This Undertaking is intended to contain Twelve Plates, each Eighteen Inches long, and Fourteen Inches deep; and as many Birds in every Piece, as the Size of it will conveniently admit; to which will be added Landscapes, with Trees, &c. suitable to the Design: To be engraven on Copper Plates in the neatest Manner by the best Hands. And particular Care will be taken that they are colour'd to the greatest Exactness; and also, that the Birds be such, as are come to their full Colours, so that they may be shewn in the liveliest and best Manner.

As nothing of this Kind has ever yet been attempted, the much desir'd on several Accounts, it is to be hoped, that a true and lively Representation of so many beautiful Creatures in their various Colours and Actions, will be very acceptable to all that are curious; and more especially to the Ladies, who have been such generous Encouragers of those useful and ingenious Sets of the Twelve Months of Flowers and Plants Pieces not long since published; for here will be a great Variety of Colours, which will afford an agreeable Amusement for Drawing, or Needle-work, &c.

There has been indeed a great many Prints of Foreign Birds publish'd, but very little Notice has been taken of our own, which are a great Number, and of great Variety of Colours, and of which most Persons would be in some measure ignorant of the Performance.

It is well known to those that have made any Observation that the Action of every Kind of Bird is different, and that a Bird be ever so well drawn in other Respects, yet if it wants that, it will be far short of the Life. And those that are curious know too, that among the Prints which are extant of our own Birds, it has not been regarded (in most of them) so much as it ought to have been. And as to the Feathering and Colouring, that has been as far from the Life, as the other.

The Subscription is Two Guineas a Set Colour'd, and One Guinea Uncolour'd, one half down, and the other half at the Delivery of the Twelve Pieces. Subscriptions are open in by the said Charles Collins in Holbourn, and John Lee at Raddon aforesaid, till Christmas next and no longer, after which none will be sold but at an advanced Price.
